OBJECTIVE

Software Engineer with 2 years of experience seeking full-time Web Development roles.

PROJECTS

MediClone App : This is a Medium app clone created using React.js, TypeScript, Tailwind CSS, and Hono + Cloudflare for the backend. It allows users to create blogs and provides an engaging and interactive platform for users to interact through blogging. ([Try it here](#))

ForgeUI App : This is an application where you can find the pre build component and can use them in your app with copy and paste. ([Try it here](#))

Rabbitype App : This is a typing speed tester web application built using React + Node.js. It allows users to measure their typing speed and accuracy, providing an engaging platform for users to practice and improve their typing speed. ([Try it here](#))
